

EcoLat is a popular recycled plastic edging system thanks to its **attractive** appearance, **strong** and **long lasting** manufacture and environmentally friendliness which can be used for a number of applications. This new generation edging product made from **post consumer recycled plastic** is perfect for creating clean and crisp divisions between two or more landscaped areas such as **lawns, flower beds, gravel paths, driveways** and more. With matching edging stakes, EcoPics, this edging is **easy to install** as the stakes are simply pushed into the ground directly behind the EcoLat before being screwed to the edging and the area backfilled for maximum strength.

FULL RECYCLED

EcoLat and EcoPics are manufactured from entirely post consumer recycled plastic

VERSATILE

EcoLat is a versatile product which can be used for a range of applications from lawns to driveways

EASY TO INSTALL

With the use of EcoPic stakes, EcoLat is easy to install. You can see an install guide on the next page

ATTRACTIVE

A slightly textured, decorative edging which gives the appearance of slate to compliment landscaped areas

FLEXIBLE

EcoLat can be installed as a straight edge or contoured to fit around bends and create circles

WEATHER RESISTANT

Made from recycled plastic, EcoLat and EcoPics are resistant to rain, heat, cold and UV rays so will not break down or rot away over time

COLOUR OPTIONS

EcoLat and matching EcoPics are available in either Grey or Brown

KEY FACTS

- » EcoLat lengths available: **20m, 10m and 1.2m**
- » Depth: **140mm**
- » Width: **7mm**
- » Material: **Recycled Plastic**
- » Weight per linear metre: **1.2kg**
- » Colours available: **Grey and Brown**
- » EcoPic Length: **380mm**
- » Width: **40mm**
- » Depth: **40mm**
- » Pack sizes: **Single or pack of 10**
- » Material: **Recycled Plastic**
- » Weight per stake: **0.25kg**
- » Colours Available: **Grey and Brown**

APPLICATIONS

LAWNS

Used around lawns to prevent grass from overgrowing and crumbly edges

FLOWERBEDS

EcoLat keeps soil, flowers and plants contained whilst preventing migration

PATHWAYS

Used to outline and confine pathways, EcoLat is the ideal edging system

DRIVEWAYS

EcoLat prevents material migration making it ideal for driveways

PATIOS

Installed around Patios to keep them separated from any surrounding areas

SEPARATION

EcoLat is ideal for keeping two or more landscaped areas divided

Installation Instructions

1. Decide where the EcoLat will be installed. Unroll your EcoLat edging and cut to size if required. EcoLat rolls are flexible so can be installed straight or contoured.
2. Dig a small trench and lay the Ecolat in to the trench. It is advised that you put a minimum of two-thirds of your Ecolat edging in to the trench.
3. Directly behind the EcoLat at around 1m intervals, mallet the EcoPic stakes into the ground. The H profile of the stakes guarantee high stability. The stakes are approx. 3 cm lower than the top of the Ecolat and will not be visible when the installation is complete (depending on the intended use).
4. Secure the Ecolat to the Ecopics using stainless steel screws (2 per stake). A spirit level may come in handy to help you create a level edging.
5. Finally, back fill the edging using soil, gravel, wood mulch or other appropriate materials to ensure the edging is secure.

PRODUCT CODE	COLOUR	DESCRIPTION	THICKNESS (mm)	DIMENSIONS (mm)	PACK SIZE	UNIT WEIGHT (kg)
E20/14	Grey	Grey EcoLat Edging - 20m	140	20000 x 7	1	24
